

eDELIVER9

VAN & CAB CHASSIS

**BRING
IT ON.**

At LDV, we've made it easier for you to make your fleet greener.

The Deliver 9 is already the van of choice for many blue-chip fleets, trusted by thousands of Australian businesses to get the job done safely and comfortably. And now it's gone electric with the eDeliver 9. So you can build your business, while also contributing to a greener tomorrow.

Zero tailpipe emissions, fast charging and up to 280km¹ range on a full charge give you the power to hit all your sustainability goals, and get the job done. And with two van models and one cab chassis to choose from, you can find an environmentally friendly addition that fits you and your team seamlessly.

1. Range figure is based on WLTP (Worldwide Harmonized Light Vehicle Test Procedure) static laboratory combined average city and highway cycle test. Figures stated for the purposes of comparison amongst vehicles tested to the same technical procedures only. Actual real world driving results will vary depending on a combination of driving style, type of journey, vehicle configuration, battery age and condition, use of vehicle features (such as heating and air conditioning), as well as operating, environmental and climate conditions. The rated range displayed on the Energy Consumption label affixed to the car is calculated according to the ADR 81/02 NEDC based standard as defined by UNECE R101/01 (rather than the WLTP), so the range displayed on the label is different to that shown here.

With three models to choose from, you can find cleaner, pure electric power in a size and shape that suits your business.

Two vans give you plenty of room for all your tools, materials and deliveries – while still leaving plenty of space for your team members up front. Take full advantage of the 10.9m³ loading volume and massive 1,410kg payload of the long wheelbase/mid-roof model. Need even more room? Then check out 12.3m³ load volume and 1,350kg payload of the long wheelbase/high-roof version.

Meanwhile, the eDeliver 9 Cab Chassis provides a sturdy, customisable base for transporting goods near and far.

With Direct Current fast charging, a quiet, smooth ride and plenty of grunt, the LDV eDeliver 9 is built to get the job done – day after day, delivery after delivery. With 150kW of power and 310Nm of torque, the eDeliver 9 has the strength to haul huge loads with ease. And with the quick accelerating power of pure electric, you'll be on your way in no time.

The 88.55kWh battery of the long wheelbase/mid-roof model gives you up to 280km² of range – plenty of power to get through a typical day's deliveries. When recharging, Alternating Current (AC) and Direct Current (DC) charging capability makes it easy at home or on the go. DC fast charging takes your battery from 20% to 80% in approximately 45 minutes³, while efficient regenerative braking sends more power back to your battery when you slow down.

Ditching the fuel means a better drive in more ways than one. No more money spent on petrol, and fewer internal engine components require less maintenance and add up to potential lower operating costs. Put your time and money where it really matters, grow your business, and get the job done.

2. Range figure is based on WLTP (Worldwide Harmonized Light Vehicle Test Procedure) static laboratory combined average city and highway cycle test. Figures stated for the purposes of comparison amongst vehicles tested to the same technical procedures only. Actual real world driving results will vary depending on a combination of driving style, type of journey, vehicle configuration, battery age and condition, use of vehicle features (such as heating and air conditioning), as well as operating, environmental and climate conditions. The rated range displayed on the Energy Consumption label affixed to the car is calculated according to the ADR 81/02 NEDC based standard as defined by UNECE R101/01 (rather than the WLTP), so the range displayed on the label is different to that shown here.

3. Charging times may vary based on factors including but not limited to charger type and condition, battery temperature, electricity supply, auxiliary consumables (e.g. air-conditioning) and environmental conditions. The time taken for successive rapid charging can take longer if the battery temperature activates the battery safeguarding technology

THE POWER TO **MOVE SUSTAINABLY**

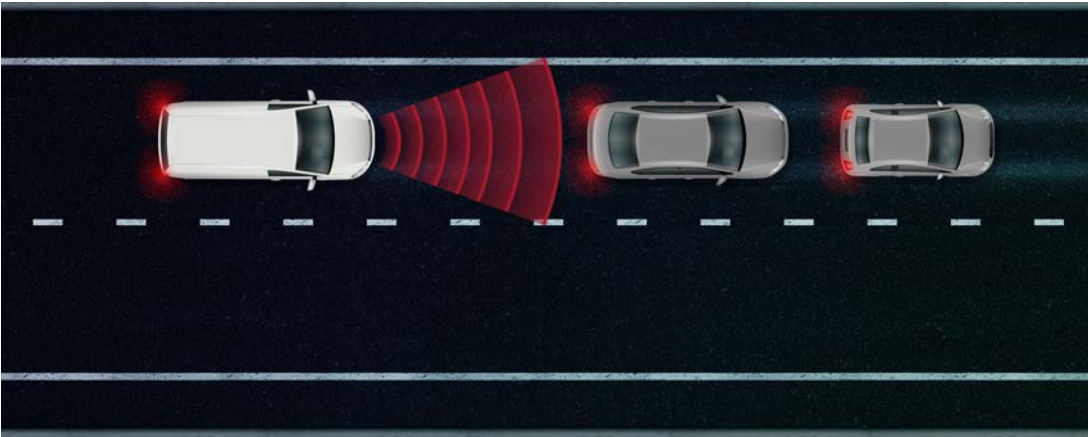

PACK IT IN

We all need a bit of space sometimes – especially when hauling huge payloads. The roomy, practical eDeliver 9 will have you loading, unloading and on your way in no time.

Get yourself and all your gear in and out easily with a sliding side door that offers 1,269mm of width for those bigger items. At the back, a low safety step and rear doors that open 236° give you the space and support to manoeuvre those heavier, awkward loads.

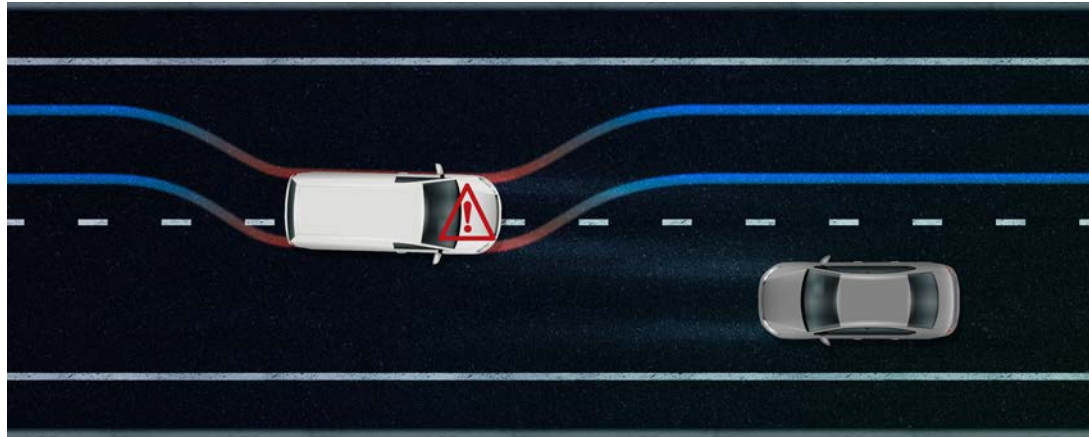

With a wheel arch width of 1,366mm, there's space for 2 Australian or 3-4 European pallets inside your eDeliver 9. Keep it tight with heavy-duty tie-down rings that provide extra security, while LED lighting and a grab handle will help you pack it all in – day or night.

AUTONOMOUS EMERGENCY BRAKING

Autonomous Emergency Braking (AEB) uses the front sensors to detect obstacles close to the vehicle. If the driver fails to take action, AEB will automatically apply the brakes.

LANE DEPARTURE WARNING

Lane Departure Warning (LDW) provides a warning to the driver when the vehicle drifts unintentionally out of the lane.

SAFETY FIRST

While sustainability is certainly a priority for the eDeliver 9, this van puts the safety of you and your drivers first.

Standard safety features⁴ include Autonomous Emergency Braking (AEB) that stops your vehicle when necessary, Lane Departure Warning alerts if you start to drift and Hill Hold for keeping you steady on steep, sloped terrain.

A wide-view reversing camera (van models) and front and rear parking sensors (front only on Cab Chassis) help you navigate tight car parks and bustling streets at peak hour, getting you in and out and onto your next stop quickly and easily.

Inside your eDeliver 9, you and your cargo will be surrounded by six airbags across the front, side and curtain areas of your van. It's well-rounded safety for more peace of mind on the road.

4. Safety technologies may not operate optimally under all driving conditions and effectiveness depends on many factors. The driver is responsible for safe and attentive driving. See owner's manual for complete details.

COMFORT FOR THE LONG HAUL

The eDeliver 9 cabin is full of features that will keep you comfortable no matter how bad the traffic or how long your delivery list.

An 8-way adjustable driver's seat makes every trip a pleasant one. And the bench seat up front provides plenty of room for three people to get stuck into work – without feeling like they're stuck in the van.

Plenty of clever storage areas ensure that tools of the trade are always at your fingertips. With overhead and underseat storage and deep door pockets, everything from your pens and pencils to your sunnies are right there. And when you need to get work done on the go, you can turn your eDeliver 9 into a mobile office by folding down the passenger seat into a desk – complete with cup and laptop holder.

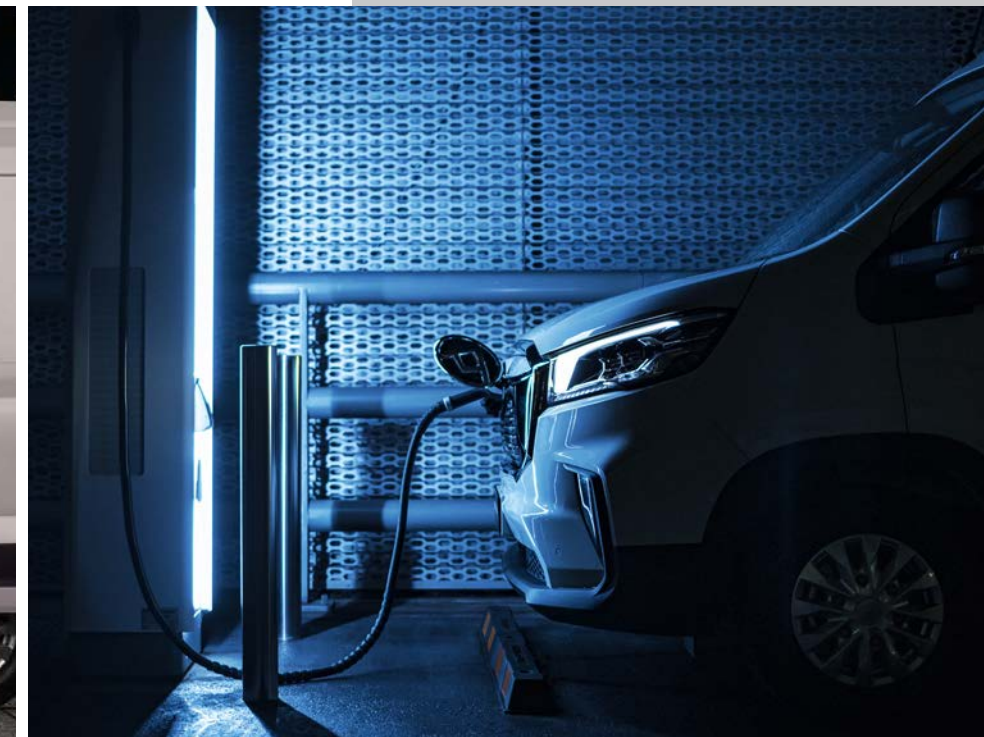

The eDeliver 9 features a tonne of innovative tech under the hood. But there's also plenty of great features within arm's reach when you're behind the wheel.

The high resolution 4.2" colour display provides easy access to range and charge information, as well as other trip essentials. Meanwhile, the 10.1" touchscreen infotainment display and steering-wheel-mounted controls put the power to answer calls, turn up your favourite song or set cruise control in your hands.

Apple CarPlay™ helps you stay safe and focused with hands-free calling, messaging and navigation. And a convenient USB port keeps your devices charged on the go, ensuring you can stay connected with the rest of your team.

It's everything you need to keep you and your day on schedule.

WORLD-CLASS ACCOLADES

LDV is a division of SAIC Motor, which is a Fortune Global 500 company and the 7th largest automotive company in the world. SAIC Motor sells over 5 million vehicles annually and has joint ventures with Volkswagen and General Motors. In 2009 SAIC Motor acquired the commercial vehicles division of British Motor Corporation, which included LDV.

WARRANTY

Work without worry with LDV's comprehensive factory-backed 5-year or 160,000km⁵ warranty on every new eDeliver 9. Your eDeliver 9 battery also comes with an 8-year or 160,000km⁵ warranty for even more peace of mind.

Best of all, after the initial service you'll only have to service it once every 12 months or 30,000km.

ROADSIDE ASSISTANCE

All eDeliver 9s come with LDV Roadside Assist⁶. If you have issues, we'll get you back on the road as quickly as possible. Enjoy this coverage 24 hours a day, 7 days a week, 365 days a year, for five years.

ACCESSORIES

Customising your eDeliver 9 is the best way to ensure it's perfectly suited to your requirements. Talk to your LDV dealer to learn more about the wide range of accessories available to have you and your eDeliver 9 performing – day in, day out.

NATIONWIDE SUPPORT

For even more peace of mind, all LDV owners enjoy the backing of our nationwide dealer network's comprehensive sales, service and parts assistance. For more information and to find your nearest dealer, visit ldvautomotive.com.au

LDV FOR FLEET

LDV's fleet program makes managing your vehicles easy. That means you can focus on running your business, whether you're just starting out or looking to grow.

With robust engineering, the latest tech and great value, eDeliver 9 will suit any business need – from putting in the hard yards on construction sites to delivering important parcels across the city.
