EXPERIENCE

EXCELLENCE

2020 is Precision Performance Motorsports' 17th year of operation, having previously fielded cars in the NASCAR Xfinity Series and the K&N Pro series, before making the jump to Lamborghini sports cars in IMSA and SRO America.

PPM is taking core values, accountability and experience gained, to translate the same drive for success to racing with Lamborghini.

PPM is composed of young, fresh perspectives and seasoned, experienced veterans with wins across the US, including the Daytona 24 and Petit Le Mans. Members of PPM have won races around the World and over 20 IMSA Championships; from Prototype to Super Trofeo.

The TEAM's sole mission is to provide drivers with an unforgettable and competitive experience; and to provide an incubator for personal and partner growth.

PROFESSIONAL RACING

RACING
WITH

SQUADRA CORSE

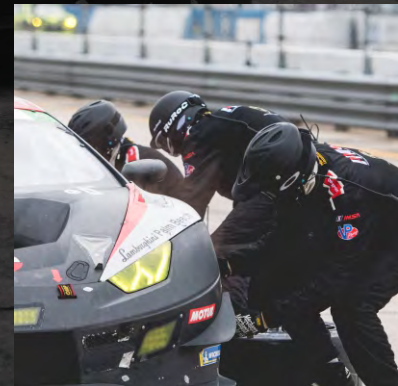

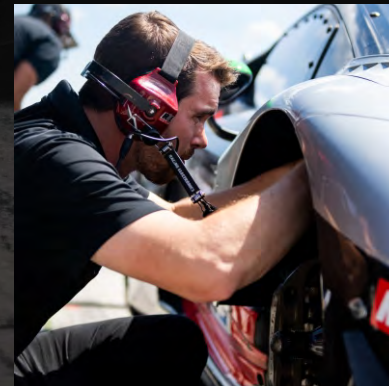

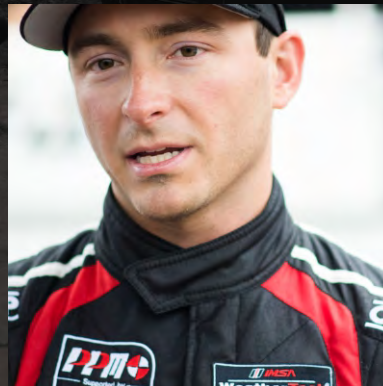

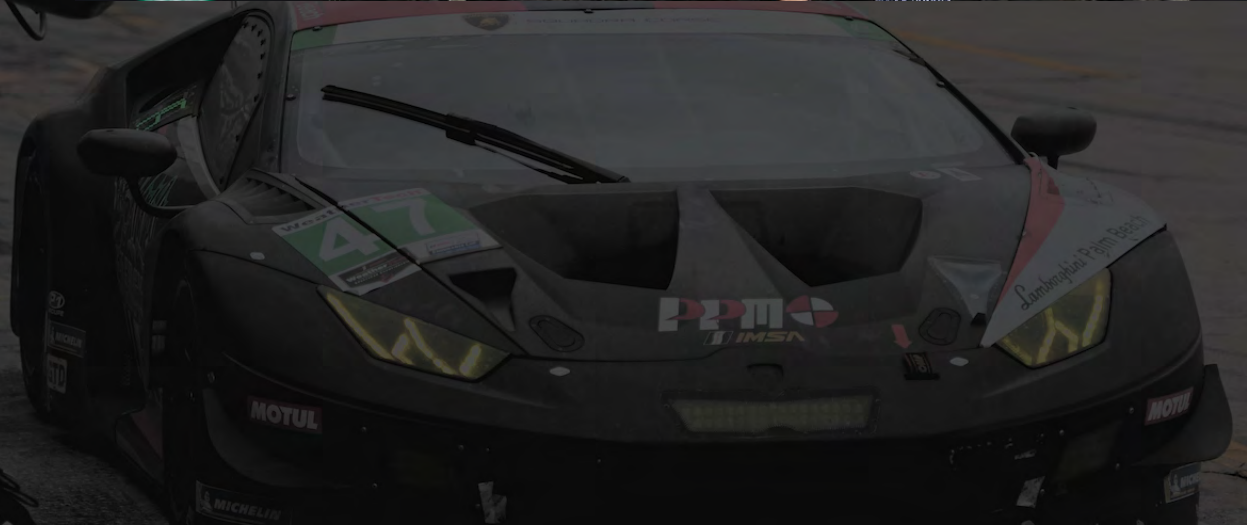

PPM decided to make a grand change and leave the circle-track world of NASCAR behind and go racing with Lamborghini.

Brandon Gdovic, the team's professional driver, was no stranger to Lamborghinis or sports car racing, having claimed the 2015 Super Trofeo World Championship.

The team is comprised of the best of both worlds, with exceptional talent that came over from NASCAR with the team, as well as proven, experienced winners in the road racing world.

In just two years as a road racing team, we have achieved a vice championship, a 2nd place finish in the SRO Intercontinental GT Challenge, a GTD (GT3) lap record, and are still the only Lamborghini to ever lap Road America in under 2:05.0.

PPM is ready to race and win with you in: IMSA, SRO America, and beyond.

HURACAN GT3 EVO

The Lamborghini Huracan GT3 EVO has cemented itself as one of the best modern-day GT3 protagonists.

Lamborghini made history, with the Huracan GT3 EVO, by becoming the first Manufacturer to twice win the GTD class at the 24 Hours at Daytona. They did this in back to back years. That wasn't enough. Lamborghini, those same two years, won the coveted 12 Hours of Sebring. Completely dominating North America's largest and most famous endurance races.

Since the EVO has been released it has seen driver, team, and manufacturer titles in: IMSA, GT Open, SRO Blancpain GT, Italian GT, and others.

In the hands of PPM, the Huracan Super Trofeo GT3 Evo captured the GT3 track record at Road Atlanta during Petit Le Mans; and holds the record to this day.

Lamborghini's hugely successful single-make series: Super Trofeo, is centered around the 620-hp, rear-wheel-drive race version of the Huracan.

Super Trofeo is the fastest single-make series in the world; eclipsing Ferrari and Porsche. They also have a unique, and simple to understand class format: Everyone has the same car and class is determined by experience. Giving a home to new racers and aspiring talents, and also every one in between.

Super Trofeo is one of the cleanest (read lowest percentage of Full Course Caution laps) and most cost effective ways to race in a professional environment, alongside IMSA.

The hospitality is second to none at the race track, making it a great venue for drivers and their sponsors and guests alike.

RACING

SERVICE

If you race on the club level or even just track days, we can still put our expertise to work for you.

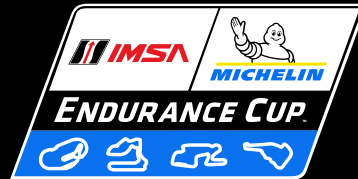

Should you be one of the lucky few that owns a Super Trofeo, either Huracan or Gallardo, and doesn't race it with Lamborghini and IMSA, look no further than PPM for any of your setup, service, storage, and race transport needs. Private and public testing is also available. We still have the surface plate and equipment to service your stock cars as well.

PPM is also able to offer a unique service few can rival: driver coaching from a Lamborghini Factory GT3 Young Driver. We have one in-house.

Our tight and long standing relationship with Lamborghini Palm Beach can be utilized to help with track days at PBIR, Lamborghini Ezperenza, facilitating purchase of your next Lamborghini road or race car, and parts support.
